## ComPresto

ComPresto is an open source application that enables you to compress, extract, and make archives with Windows shell extensions. If you are looking to create zip files, compress folders, and extract files in Windows Vista, 7, and 8, then check out ComPresto. You can create zip files, compress folders, extract files, and create archives from the ComPresto interface. I created ComPresto because I like to zip and compress files and folders on my PC. With the ComPresto shell extensions, I can zip and compress folders from my desktop. You can see the ComPresto interface below. From the window, you can compress and extract files in a zip or tar format. ComPresto Interface: Free Download ComPresto 1.4.0 from Softpedia ComPresto download includes: Windows Shell Extensions - If you don't have Windows shell extensions installed, ComPresto will download and install them for you. Extract Verification Message - If this message appears after you extract the file, you can click the message to navigate to the location where you want to extract the file. Export Path List - If you want to extract or compress files to a specific location, you can add that location to the export path list. To remove the settings, right-click the ComPresto icon from the system tray, select Properties, and uncheck the box that says "Show extract verification message." ComPresto unzips files based on the file extension. You can also choose to unzip files by specific file attributes like the owner and/or group. ### **What's New in the ComPresto?**

This application can be used to compress one or more files into a.zip archive.  When an archive file is created, a password will be required to open the archive file. The password can be created by entering the same value twice.  The application has a checkmark for the "Create a password" box. If this checkmark is not available, you must provide a password on your own.  Before extracting files, ComPresto will display a message asking for confirmation. You can hide this window by pressing the ESC key.  Before extracting files, ComPresto will display a "Checking files for validity..." window. If you don't want to display this window, you can hide it by pressing the ESC key.  Before extracting files, ComPresto will display a "Checking free space..." window. If you don't want to display this window, you can hide it by pressing the ESC key.  The application will not display a "File Copying..." window during a build or an extract. You can hide this window by pressing the ESC key.  The application will not display a "Processing..." window during a build or an extract. You can hide this window by pressing the ESC key.  The application will not display a "File Copying..." window during a build or an extract. You can hide this window by pressing the ESC key.  When file name endings are in ISO-8859-1, they will be converted to UTF-8 format when the archive is created.  The application will not handle file name endings that do not fit in a 100-character window. You can download ComPresto by clicking the Download button below. ComPresto Home Page:  ComPresto Free Home Page:  ComPresto Information:  Tips:  The application can be used to compress multiple files into one archive. To do this, place the files in a list that is then selected by clicking the drop-down button, then select "Compress".  While using the shell extension
